

## Baptist Health 401(k) Plan Investment Options Guide as of January 3, 2022

Refer to this *Investment Options Guide* for fund descriptions of each investment option that will be in your Baptist Health 401(k) Plan.

---

### American Funds EuroPacific Growth Fund® Class R-6

**Fund code:** OUBE

**Objective:** The investment seeks long-term growth of capital.

**Strategy:** The fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently; Someone who is willing to accept the higher degree of risk associated with investing overseas.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/01/2009. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/16/1984, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

---

### Fidelity BrokerageLink®

**Fund code:** BLNK

**Objective:** To provide a broad range of mutual funds that allow you expanded choices in managing your retirement savings more actively.

**Strategy:** BrokerageLink is a brokerage account within your retirement plan. You alone decide how to invest the assets in your Fidelity BrokerageLink® account. You can invest in a vast array of mutual funds from either Fidelity, or from Fidelity and other mutual fund companies through BrokerageLink. Brokerage services are provided through Fidelity Brokerage Services LLC, a member of the New York Stock Exchange and Securities Investor Protection Corporation.

**Risk:** BrokerageLink includes investments beyond those in your plan's lineup. The plan fiduciary neither evaluates nor monitors the investments available through BrokerageLink. It is your responsibility to ensure the investments you select are suitable for your situation including your goals, time horizon, and risk tolerance. See the fact sheet and commission schedule for applicable fees and risks. This account is neither a mutual fund nor is it managed by any of the Fidelity Investments group of companies.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is comfortable with evaluating and researching a broad universe of mutual funds, and who wants to invest part of his or her retirement savings in mutual funds through a brokerage account; Someone who wants the highest degree of variety in selecting mutual funds investments for his or her retirement savings, and who is familiar with how a brokerage account operates.

#### **Fidelity® 500 Index Fund**

---

**Fund code:** 2328

**Objective:** Seeks to provide investment results that correspond to the total return (i.e., the combination of capital changes and income) performance of common stocks publicly traded in the United States.

**Strategy:** Normally investing at least 80% of assets in common stocks included in the S&P 500 Index, which broadly represents the performance of common stocks publicly traded in the United States.

**Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

#### **Fidelity® U.S. Bond Index Fund**

---

**Fund code:** 2326

**Objective:** Seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg Barclays U.S. Aggregate Bond Index.

**Strategy:** Normally investing at least 80% of the fund's assets in bonds included in the Bloomberg Barclays U.S. Aggregate Bond Index. Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Index using a smaller number of securities. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund's risk exposure. Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Bloomberg U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.

Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

### **Lincoln Stable Value Account**

---

**Fund code:** GA6I

**Objective:** The Lincoln Stable Value Account seeks to maximize investment income while maintaining preservation of capital.

**Strategy:** The Lincoln Stable Value Account is a group fixed annuity issued by The Lincoln National Life Insurance Company. It invests in a diversified portfolio of fixed income instruments. Lincoln Investment Management Company (LIMCO) is responsible for establishing, implementing, and providing oversight for the investment strategy and risk management of Lincoln Stable Value portfolios. LIMCO chooses external asset managers to research and select investments, with the exception of commercial mortgage and real estate sectors, which are managed internally. Guarantees for the Lincoln Stable Value Account are subject to the claims-paying ability of the issuer.

**Risk:** The fund is backed by a diversified portfolio of fixed-income assets held in the general account of the issuer. Guarantees are subject to the claims paying ability of the issuer. Restrictions or fees may apply to exchanges or withdrawals. The Contracts provide for the payment of certain withdrawals and exchanges at book value during the terms of the Contracts. In order to maintain the Contract issuers' promise to pay such withdrawals and exchanges at book value, the Contracts subject the fund and its participants to certain restrictions. For example, withdrawals prompted by certain events (e.g., layoffs, early retirement windows, spin-offs, sale of a division, facility closings, plan terminations, partial plan terminations, changes in laws or regulations) may be paid at the market value of the fund's securities, which may be less than your book value balance or may restrict withdrawals in these events. Additional risk information for this product may be found in the prospectus or other product materials, if available. Certain investment options offered by your plan (e.g., money market funds, short term bond funds, certain asset allocation/lifecycle funds and brokerage window) may be deemed by the Contract issuers to "compete" with this fund. The terms of the Contracts prohibit you from making a direct exchange from this fund to such competing funds. Instead, you must first exchange to a non-competing fund for 90 days. While these requirements may seem restrictive, they are imposed by the Contract issuers as a condition for the issuer's promise to pay certain withdrawals and exchanges at book value.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who seeks a slightly higher yield over the long term than is offered by money market funds, but who is willing to accept slightly more investment risk; Someone who is interested in balancing an aggressive portfolio with an investment that seeks to provide a declared crediting rate that is reset on a periodic basis.

The investment option is an annuity. The fund is managed by Lincoln National Life Insurance Company. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

### **Metropolitan West Total Return Bond Fund Plan Class**

---

**Fund code:** OU8E

**Objective:** The investment seeks to maximize long-term total return.

**Strategy:** The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets in investment grade fixed income securities or unrated securities determined by the Adviser to be of comparable quality. Up to 20% of the fund's net assets may be invested in securities rated below investment grade or unrated securities determined by the Adviser to be of comparable quality. The fund also invests at least 80% of its net assets plus borrowings for investment purposes in fixed income securities it regards as bonds.

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 07/29/2011. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 03/31/1997, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

### **Vanguard Mid-Cap Index Fund Institutional Shares**

---

**Fund code:** OQQT

**Objective:** The investment seeks to track the performance of the CRSP US Mid Cap Index that measures the investment return of mid-capitalization stocks.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the CRSP US Mid Cap Index, a broadly diversified index of stocks of mid-size U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

**Risk:** Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The CRSP US Mid Cap Index targets inclusion of the U.S. companies that fall between the top 70%-85% of investable market capitalization.

### **Vanguard Small-Cap Index Fund Institutional Shares**

---

**Fund code:** OMZE

**Objective:** The investment seeks to track the performance of the CRSP US Small Cap Index that measures the investment return of small-capitalization stocks.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Index, a broadly diversified index of stocks of small U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

**Risk:** The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The CRSP US Small Cap Index includes U.S. companies that fall between the bottom 2%-15% of the investable market capitalization. There is no lower limit in market capitalization, other than what is specified by investability screens.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 07/07/1997. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 10/03/1960, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

#### **Vanguard Target Retirement 2015 Trust Plus**

---

**Fund code:** O4L9

**Objective:** Seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Strategy:** The trust invests in Vanguard mutual funds using an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2015 (the target year). The trust's asset allocation will become more conservative over time. Within seven years after 2015, the trust's asset allocation should resemble that of the Target Retirement Income Trust Plus. Unit price and return will vary.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

The investment option is a collective investment trust. It is managed by Vanguard. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/15/2011. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 06/28/2007, adjusted to reflect the fees and expenses of this share class (when

this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

### **Vanguard Target Retirement 2020 Trust Plus**

---

**Fund code:** O4M0

**Objective:** Seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Strategy:** The trust invests in Vanguard mutual funds using an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2020 (the target year). The trust's asset allocation will become more conservative over time. Within seven years after 2020, the trust's asset allocation should resemble that of the Target Retirement Income Trust Plus. Unit price and return will vary.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

The investment option is a collective investment trust. It is managed by Vanguard. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/15/2011. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 06/22/2007, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. ### **Vanguard Target Retirement 2050 Trust Plus**

---

**Fund code:** O4M6

**Objective:** Seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Strategy:** The trust invests in Vanguard mutual funds using an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2050 (the target year). The trust's asset allocation will become more conservative over time. Within seven years after 2050, the trust's asset allocation should resemble that of the Target Retirement Income Trust Plus. Unit price and return will vary.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option that gradually becomes more conservative over time and who is willing to accept the volatility of the markets; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

The investment option is a collective investment trust. It is managed by Vanguard. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/15/2011. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 06/28/2007, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

This investment option is not a mutual fund.

---

### **Vanguard Target Retirement Income Trust Plus**

**Fund code:** O4L8

**Objective:** Seeks to provide current income and some capital appreciation.

**Strategy:** The trust invests in Vanguard mutual funds according to an asset allocation strategy designed for investors currently in retirement. Unit price and return will vary.

**Risk:** The fund is subject to the volatility of the financial markets, including that of equity and fixed income investments. Fixed income investments carry issuer default and credit risk, inflation risk, and interest rate risk. (As interest rates rise, bond prices usually fall,

and vice versa. This effect is usually more pronounced for longer-term securities.) Principal invested is not guaranteed at any time, including at or after retirement. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option and looking primarily for the potential for income and, secondarily, for share-price appreciation.

The investment option is a collective investment trust. It is managed by Vanguard. This description is only intended to provide a brief overview of the fund.

This investment option is not a mutual fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/15/2011. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 06/22/2007, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

### **Vanguard Total International Bond Index Fund Admiral™ Shares**

---

**Fund code:** OSD7

**Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of non-U.S. dollar-denominated investment-grade bonds.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged). This index provides a broad-based measure of the global, investment-grade, fixed-rate debt markets. It is non-diversified.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Suitable hedging transactions used to reduce or hedge a fund's exposure to changes in the value of the currency may not be available in all circumstances, may not be successful, and may eliminate any chance for the fund to benefit from favorable fluctuations in relevant foreign currencies. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to complement his or her core bond holdings with international bond investments and who can tolerate the greater risks associated with foreign investments.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged) includes government, government agency, corporate, and securitized non-U.S. investment-grade fixed income investments, all issued in currencies other than the U.S. dollar and with maturities of more than one year. The index is capped, which means that its exposure to any particular bond issuer is limited to a maximum of 20%. Additionally, issuers that individually constitute 5% or more of the index may not constitute, in the aggregate, more than 48% of the index. If the index, as constituted based on market weights would exceed the 20% or 48% limit, the excess is reallocated to bonds of other issuers represented in the index.

## Vanguard Total International Stock Index Fund Institutional Shares

---

**Fund code:** OERM

**Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the FTSE Global All Cap ex US Index, a float-adjusted market-capitalization-weighted index designed to measure equity market performance of companies located in developed and emerging markets, excluding the United States. It invests all, or substantially all, of its assets in the common stocks included in its target index.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently; Someone who is willing to accept the higher degree of risk associated with investing overseas.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The FTSE Global All Cap ex US Index is part of a range of indices designed to help US investors benchmark their international investments. The index comprises large, mid and small cap stocks globally excluding the US.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 11/29/2010. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/29/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

## Victory Trivalent International Small-Cap Fund Class R6

---

**Fund code:** OSF7

**Objective:** The investment seeks long-term growth of capital.

**Strategy:** The adviser pursues the fund's investment objective by investing primarily in equity securities of companies principally in countries represented in the S&P® Developed ex-U.S. SmallCap Index. Under normal circumstances, at least 80% of the fund's assets will be invested in securities of small-capitalization companies.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking to complement a portfolio of domestic investments with international investments in smaller companies, which can behave differently; Someone who is willing to accept the higher degree of risk associated both with investing overseas and with investing in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The S&P Developed ex-U.S. SmallCap Index is a free float adjusted market capitalization index that measures the equity performance of small capitalization companies from developed markets around the world excluding the U.S.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 06/01/2012. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 08/17/2007, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
